

ARA U.S. SALES CIRCUITS

The ARA U.S. Sales Circuit is formulated along the lines of the American Philatelic Society Sales Circuit.

ARA U.S. Sales Circuit books resemble the APS books, with sixteen bound pages. Five formats are available (1, 4, 6, 9 or 12 stamp spaces per page.) Oversized one space per page books, 8½ x 11 inches, for large taxpays, revenues on documents and the like are also available. Only items will be accepted which can fit within the 4¾ x 7¼ inch borders of the smaller books, or within the 8½ x 11 inch borders of the oversized books.

Books sell for 50¢ each, postpaid, regardless of format. Those submitting large material should request blank books, and affix glassine envelopes to the pages to contain their material.

Members submitting books for circulation should use the categories shown on the circuit request form below as a guide for the mounting of material. Do not combine categories within a book.

This service is a benefit of ARA membership, and is available only to members of good standing.

A 10% sales commission will cover expenses of this service. Each member with U.S. collecting interests is encouraged to participate. Sales circuits are an easy way to add to your collection and to dispose of duplicates and unwanted material.

Send all correspondence to Paul Weidhaas, ARA U.S. Sales Circuit Manager, 208 Van Ostrand Rd, Newfield, NY 14867-9204.

REQUEST FOR U.S. SALES CIRCUITS

To: Paul Weidhaas
ARA U.S. Sales Circuit Manager
208 Van Ostrand Rd
Newfield, NY 14867-9204

Please include me in the following ARA U.S. revenue sales circuits (circled below). I agree to be bound to the rules indicated in the books and, but not limited to: assuming full responsibility for the safety of the circuits while in my or my agent's possession, prompt forwarding of the circuit material by the means specified to the next person on the circuit, and prompt payment of any fees to the ARA and for any material kept by me. I am a current ARA member in good standing. My signature signifies agreement to these conditions and the circuit rules in and accompanying the circuits.
